DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27,34, and 44, drawn to vehicle interaction communication system, classified in class 340, subclass 901.
 - II. Claims 28-31,36-43, drawn to a road mounted vehicle information transmitter, classified in class 340, subclass 905.
 - III. Claims 33-35, drawn to a method for controlling a vehicle, classified in class 340, subclass 439.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I,II, and III are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, invention (I) is directed to a vehicle interaction communication system wherein information pertaining to an operational aspect of a first moving vehicle are transmitted over a local area network to a second vehicle via an intermediate transceiver, or directly to the second vehicle, thereby providing the operational aspect of the first vehicle to the second vehicle. Invention (II) is directed towards an unrelated process wherein a fixed road mounted transmitter provides information to a passing vehicle. Invention (III) is directed to a further unrelated process a fixed transceiver receives operational aspects

of a vehicle, wherein operational aspects of the vehicle are controlled based on the received operational aspect of the vehicle.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DARYL C. POPE whose telephone number is 571-272-2959. The examiner can normally be reached on M-TH 9:00-7:30.
